PROFESSIONAL SUMMARY

Results-driven React Native Developer with 5+ years of experience building scalable, high-performance mobile applications for B2B and B2C platforms. Experienced in developing applications across Travel, ERP, HRMS, Retail, Event Management, Social Networking, BLE, and E-commerce domains.

Strong expertise in:

- React Native & React JS Development
- API & GraphQL Integration
- Mobile Application Architecture
- Cross-platform Development
- Payment Gateway Integration
- Team Leadership & Mentorship
- Agile Development & Sprint Planning

Skilled in delivering user-friendly, scalable, and optimized mobile applications with modern UI/UX practices and native device integrations including geolocation, push notifications, BLE, camera, background services, and biometric authentication.

WORK EXPERIENCE

Software Engineer Level-2

OneClick IT Consultancy Pvt Ltd* | *Ahmedabad [Oct 2023 - Present]

Leading React Native mobile application development projects. Handling project architecture, sprint planning, and technical decisions. Managing projects independently and coordinating with clients. Performing code reviews and mentoring team members. Creating WBS and project estimations. Developing scalable applications for Travel Booking, Event Management, Social Networking, BLE Applications.

React Native Developer

Alpha E Barcode Solutions Pvt Ltd* | *Ahmedabad [Jan 2021 - Oct 2023]

Developed mobile applications for HRMS, ERP, and Retail solutions. Integrated APIs and real-time synchronization features. Improved application performance and UI responsiveness. Worked with third-party libraries and native integrations. Built mobile solutions with advanced business workflows.

TECHNICAL SKILLS

- React Native
- JavaScript
- TypeScript
- Redux
- Context API
- Native Modules
- React JS
- GraphQL
- Firebase
- WebSocket Integration
- Razorpay

AI Tools

- Antigravity
- Kilo Code
- Cline
- Gemini AI
- Claude AI

FEATURED PROJECTS

Travel Terminus – Flight & Hotel Booking App (B2B & B2C) (React Native)

A complete travel booking platform enabling users to book domestic and international flights and hotels with supplier integrations.

Key Features

Developed a complete B2B & B2C travel booking platform that enables users to search and book domestic and international flights and hotels with seamless supplier integrations. Implemented one-way and roundtrip booking flows, real-time fare breakdowns, baggage information, refund policies, loyalty points system, and Razorpay payment integration to enhance booking experience and user engagement. Focused on optimizing booking workflows, search performance, and user-friendly mobile experience across Android and iOS platforms.

Wrld – Connect In Person (US Client)(React Native)

Developed a social networking platform for college students to connect through events and real-time communication.

Key Features

Built a social networking platform designed for college students to connect through events and real-time interactions. Developed functionalities including event creation, participation management, follow systems, real-time messaging, and map-based attendee discovery. Implemented nearby participant tracking features to improve engagement and social interaction among users while ensuring smooth and scalable application performance.

ReqsQ – Emergency Alert Application (US Client)(React Native)

Human safety application integrated with BLE wearable devices.

Key Features

Developed a human safety and emergency alert application integrated with BLE wearable devices for real-time emergency response and tracking. Implemented Bluetooth connectivity, background location tracking, emergency audio recording, and alert notification systems for emergency contacts. Also worked on crash and fall detection features using native modules to enhance user safety during panic or accident situations.

Alpha Payroll – HRMS Solution (React Native)

Enterprise HR and Payroll management mobile application.

Key Features

Built an enterprise HRMS and Payroll management mobile application for employee management, attendance tracking, and workforce monitoring. Implemented features such as live location tracking, biometric authentication, leave management, task notifications, and Google Maps integration for tracking salesman tour paths and attendance activities. Focused on creating secure, scalable, and easy-to-use HR management workflows.

Gretail Extreme (React Native)

Retail management application for small and large businesses.

Key Features

Developed a B2B retail ERP application for small and large businesses with functionalities including billing, invoicing, payment management, and reporting systems. Integrated Bluetooth printing support for Rugtek and Sunmi printers, Razorpay payment gateway, and dynamic watermark image capture using socket programming. Also implemented graphical analytics and reporting modules to improve business insights and operational efficiency.

EDUCATION AND TRAINING

Bachelors in Information Technology

Ganapat University [March 2017 - March 2021]

City: Mehsana | **Country:** India

Language

English, Hindi, Gujarati
